TEATS & ACCESSORIES

How to use BIOLAC for Koalas

Recent work has shown that the carbohydrates in Koala milk contain a large amount of oligosaccharides. This has enabled Biolac to produce a suitable high energy, four stage milk product by incorporating Galacto-Oligosaccharides (GOS) into its M100 product.

M100 GOS

Critical care patients

For early lactation up to 200 days
160gms per litre or 16gm per 100ml

M100

For early lactation to mid stage
160gms per litre or 16gm per 100ml

M150

For mid stage lactation
180gms per litre or 18gm per 100ml

M200

For late stages and as supplementary milk only
240gms per litre; or 24gm per 100ml

M100 GOS energy levels: 390 kilojoules per 100ml

M100 energy levels: 390 kilojoules per 100ml

M150 energy levels: 521 kilojoules per 100ml

M200 energy levels: 645 Kilojoules per 100ml
